IAC ANNUAL CONFERENCE

Entering its 35th year of existence the Intertribal Agriculture Council is once again descending on Las Vegas, during the National Finals Rodeo, to produce its Annual Conference. The IAC Annual Conference is a 3-day event filled with informative sessions, policy updates, captivating keynote speakers, booths and exhibits, and an Artisan Marketplace. Held at Virgin Hotels & Casino the IAC Annual Conference is THE place to gather updates, knowledge, and insights on what is happening in Agriculture in INDIAN COUNTRY.

The IAC Annual Conference is the only national conference dedicated to Food & Agriculture in Indian Country. The event focuses on improving federal and state program access, policy change through the U.S. Farm Bill as well as innovative regenerative agriculture methods that will help inspire broader market access for Native products, improved ecological conditions, and increased overall sovereignty for Native producers.

The IAC Annual Conference, historically, attracts over 900 attendees, from every sector related to Indian Agriculture. The event is designed with Native farmers and ranchers at the center, participants also include governmental, non-governmental, youth, and private sector representatives.

By participating as a Sponsor your organization is provided the opportunity to ELEVATE the profile of your organization and business in front of the foremost experts and leaders on Native agriculture – everything from producing, to processing, marketing and policy development.
